## ABOUT ARTGLASS

ARTGLASS Ltd. is a purely Czech pro-export corporation that is growing dynamically without foreign capital. The company operates in 45 global markets and is continuously working towards entering new ones with humility and respect. ARTGLASS has been active in the market for 25 years with great success, and has the vision to become a world producer of original and design-led lighting made from high-quality materials with a high proportion of manual craftsmanship. The company currently employs around 100 qualified employees and works very closely with renowned Czech glassmakers and world-famous designers. ARTGLASS's great strength is the company's in-house team of progressive designers, whose original and unique ideas in terms of high-quality design now adorn countless interiors around the world. After 25 years of continuous development it is currently possible to divide the production programme at ARTGLASS Ltd. into three branches: firstly, the production of traditional Czech crystal chandeliers – we are a proud follower of more than 500 years of tradition in chandelier production in the Czech Republic; secondly, custom lighting – lighting projects for private residences, religious buildings (churches, temples, mosques), restaurants, hotels, etc. We offer our clients a comprehensive solution for lighting, from the design and consultation phase through to advice and assembly. We have a specially trained team of assemblers who install our products in clients' premises around the world. Finally, modern design collections – our original vision of transforming a project installation into a smaller model that will suitably complement a modern home. These contemporary design collections are displayed in all their glory in our new „Vision“ catalogue, which can be downloaded at [www.artglass.cz](http://www.artglass.cz).

## PRODUCTION

ARTGLASS is constantly investing in its development, new technologies and the skills of its employees. Lighting designs and models are created in our own design studio, which is equipped with state of the art technology. Using 3D software we are able to visualise the entire installation in its interior. We then elaborate on this proposal down to the last detail, including the preparation of technical documentation for production itself. We can be proud of the fact that the majority of the manufactured parts are the result of work by our skilled craftsmen. The company has a modern metal workshop where our specialists are able to construct even the most demanding metal structures for our installations.

ARTGLASS cooperates with most Czech glassworks, both in the production of chandeliers with classic trimmings or when working on special installations. Our lighting installations use modern lighting technology and lighting control to enhance the beauty of our glass while meeting all the lighting requirements of the room. All of our products meet the required standards and regulations and are certified by renowned global testing laboratories. Our goal is to introduce the beauty of Czech glass and the art of our people, whose work we are so proud of, to the whole world.

## INTRODUCING **SNOWFLOWER** FROM ART OF NATURE COLLECTION

**an**  
ART OF NATURE  
COLLECTION

This lighting fixture represents purity and the birth of life, locked in a neverending cycle. The inspiration for this design was a spring flower that comes to life at the end of winter, symbolising the approach of spring. Snowflower is constructed out of overlapping glass petals. The centre of the light, which represents the heart of the flower, features crystal trimmings and chains.

## INTRODUCING **MANHATTAN** FROM PARTICLES COLLECTION

Manhattan is a ceiling installation inspired by the city's silhouette, a city landscape full of modern skyscrapers. It consists of a number of detailed glass and metal elements that refer to the technical construction of the modern period. The play on individual, triangular-like elements reminiscent of beam construction has an extraordinary charm.

## GREAT BRITAIN PRIVATE RESIDENCE

We have a private residence in the UK equipped with a combination of custom-made and residential lighting fixtures. The main element of the staircase interior is a custom made 6 meter high cascade lighting fixture. Individual cascades have irregular edges formed by shining trimmings that evoke overflowing water. The other rooms of the residence were equipped with smaller trimmings fixtures that underline the exquisite design of the entire mansion.

## INTRODUCING **VIENNA**

Beautiful chandelier from our collection of classic crystal lighting fixtures with designs that perpetuate the Bohemian tradition. The combination of glass and metal elements together form the perfect lighting fixture that has been sought-after for generations.
