ARTGLASS
CHANDELIERS FROM BOHEMIA

ABOUT ARTGLASS

ARTGLASS Ltd. is a purely Czech pro-export corporation that is growing dynamically without foreign capital. The company operates in 45 global markets and is continuously working towards entering new ones with humility and respect. ARTGLASS has been active in the market for 25 years with great success, and has the vision to become a world producer of original and design-led lighting made from high-quality materials with a high proportion of manual craftsmanship. The company currently employs around 100 qualified employees and works very closely with renowned Czech glassmakers and world-famous designers. ARTGLASS's great strength is the company's in-house team of progressive designers, whose original and unique ideas in terms of high-quality design now adorn countless interiors around the world. After 25 years of continuous development it is currently possible to divide the production programme at ARTGLASS Ltd. into three branches: firstly, the production of traditional Czech crystal chandeliers – we are a proud follower of more than 500 years of tradition in chandelier production in the Czech Republic; secondly, custom lighting – lighting projects for private residences, religious buildings (churches, temples, mosques), restaurants, hotels, etc. We offer our clients a comprehensive solution for lighting, from the design and consultation phase through to advice and assembly. We have a specially trained team of assemblers who install our products in clients' premises around the world. Finally, modern design collections – our original vision of transforming a project installation into a smaller model that will suitably complement a modern home. These contemporary design collections are displayed in all their glory in our new „Vision“ catalogue, which can be downloaded at www.artglass.cz.

PRODUCTION

ARTGLASS is constantly investing in its development, new technologies and the skills of its employees. Lighting designs and models are created in our own design studio, which is equipped with state of the art technology. Using 3D software we are able to visualise the entire installation in its interior. We then elaborate on this proposal down to the last detail, including the preparation of technical documentation for production itself. We can be proud of the fact that the majority of the manufactured parts are the result of work by our skilled craftsmen. The company has a modern metal workshop where our specialists are able to construct even the most demanding metal structures for our installations.

ARTGLASS cooperates with most Czech glassworks, both in the production of chandeliers with classic trimmings or when working on special installations. Our lighting installations use modern lighting technology and lighting control to enhance the beauty of our glass while meeting all the lighting requirements of the room. All of our products meet the required standards and regulations and are certified by renowned global testing laboratories. Our goal is to introduce the beauty of Czech glass and the art of our people, whose work we are so proud of, to the whole world.

INTRODUCING **FLOW** FROM ART OF WATER COLLECTION

A wave of shining glass rods ingeniously illuminated from the centre. This stunning and innovative piece offers an unforgettable lighting experience from any angle.

FLOW is equipped with two light circuits. The first circuit consists of a powerful white LED strip at the bottom of the fixture and serves as a functional illumination device. The second circuit consists of two RGB LED tapes inside the fixture. Using the LED controller you can create different colour effects.

INTRODUCING **ICEFALL** FROM ARS ILLUSTRANDI COLLECTION

Icefall is a picture of winter, cold, which creates a unique and transient icy beauty.

The design is reminiscent of the struggle of ice and water, the moment when the glacier reluctantly succumbs to the ocean. The lighting fixture itself consists of coloured glass elements featuring sharp lines that change in the centre in a flood of shining trimmings. Just like glaciers that, on the brink of their strength, melt and disappear in the ocean.

CREATING DESIGN LIGHTING

Choosing the right lighting fixture can be a complex process – one we're here to help you with. During the initial phase, you may find our catalogs helpful: they are available for download on our website where you can also find samples of previously completed lighting projects.

If you decide to design an original lighting for your interior, you can share your ideas with us by simply talking us through them and/or by sharing your sources of inspiration including photos, sketches, architect's drawing, etc. If you're not sure what you want your fixture to look like, we will create a design proposal for you in line with the materials you prefer and the interior where the lighting fixture will be installed. We will give you a clearer idea of the fixture by showing you an outline, sketch or other visual references, often generated from the 3D model.

If you are satisfied with overall design of the lighting fixture and we have agreed on all business essentials, the order will be placed. At this stage, the details of the fixture are painstakingly entered to create a 3D model and production begins. When all the components are ready, we test the fixture by fully or partly assembling it. Next, we carefully package all the components of the lighting fixture and send them directly to you.

Installation is another service we provide and we can install our fixtures anywhere in the world. We have a team of experienced installers who will assemble and fit the fixture to your satisfaction.

INTRODUCING **ARABELA**

Arabela (1200x1700 mm) is one of our majestic lighting fixtures richly decorated with chandelier pendants and an arrestingly original design. Choose this magnificent chandelier to become a striking talking-point in your classic or modern interior.
